The Brazilian Journal of Pharmaceutical Science

Profª. Elfriede Marianne Bacchi

Professora Titular do Departamento de Farmácia da Faculdade de Ciências Farmacêuticas, Universidade de São Paulo

The Brazilian Journal of Pharmaceutical Sciences (ISSN 1984-8250), previously, Revista Brasileira de Ciências Farmacêuticas/Brazilian Journal of Pharmaceutical Sciences (ISSN 1516-9332), published by the Faculty of Pharmaceutical Sciences of the University of São Paulo, with quarterly periodicity has the purpose to publish original articles related to the areas of knowledge of Pharmaceutical Sciences. It also publishes update or revision works, which will be included only when requested to specialists by the Publications Commission or when submitted in the form of Abstract for evaluation as to the interest, as well as Preliminary Notes of research work. In the New Publications section, it includes reviews prepared by experts, as suggested by the Publications Committee. Thematic supplements and those relating to Scientific events may be published with prior approval of the Publications Committee. It also publishes contributions from foreign experts.

The origin of the Brazilian Journal of Pharmaceutical Sciences dates back to the "Annals of Pharmacy and Dentistry of USP", a journal started in 1939. In 1963, started the "Journal of the Faculty of Pharmacy and Biochemistry of the University of São Paulo", that in 1970 received the title of "Journal of Pharmacy and Biochemistry of the University of São Paulo". In 1999, it was totally reformulated, receiving the denomination of Revista Brasileira de Ciências Farmacêuticas / Brazilian Journal of Pharmaceutical Sciences. In addition, in 2009 it began to publish in English only.

The purpose of the Brazilian Journal of Pharmaceutical Sciences is to publish manuscripts that contribute significantly to knowledge in all areas of Pharmaceutical Sciences including Medicines and Drugs, Pharmaceutical Care and Healthcare, Food and Experimental Nutrition, Clinical Chemistry, Toxicology, Medicinal Chemistry, Pharmaceutical Technology, Biotechnology and others.
